

HURRICANE GUIDELINES

FOR POOL OPERATORS

Hurricane season is unavoidable, but preparing your pool for storms will help significantly with post-storm recovery. As always, **follow all instructions from local authorities regarding shelter and evacuation.**

STORM PREP

Below is a pool checklist to take into consideration when preparing for storms.

- Close the pool.
- Do not put a pool cover on the pool.
- Clean and recharge the pool filter.
- Unplug the the chemical controller.
- Store deck equipment inside.
- Check and adjust water chemistry.
- Clean debris strainers and pump impellers.
- Raise the FAC level above 5 ppm.
- Turn off all pool equipment at the breaker.
- Take pictures for insurance purposes.

Poolsure will continue service until it is no longer safe to operate in your area.

POST STORM RECOVERY

If your property was impacted by the storm, **please confirm the following** before requesting service from Poolsure:

- ✓ Evacuation orders have been lifted
- ✓ Curfews are no longer in effect
- ✓ Major roads to the property are open
- ✓ Flooded and equipment areas are dry
- ✓ Power is restored to the property
- ✓ No health or safety hazards to those entering the property
